- Frameworks & Libraries: React.js, Node.js (Beginner), Express.js (Beginner)
- Cloud Technologies: Azure (Beginner), AWS (Beginner)
- Database: MySQL, MongoDB
- Tools & Technologies: Git & Github, VS Code, Postman, Figma, Android Studio
- Development Practices: MVC Architecture, Version Control, Agile Methodology

## Professional Skills

- Teamwork & collaboration
- Communication skills
- Fast learner & adaptability
- Problem-solving
- Time management

---

## Projects

### ReBuy.lk - Second Hand Goods Marketplace

Aug 2025 - Oct 2025

Role: Full Stack Developer (Team Project)

Technologies: React, Node.js, Express.js, MongoDB, Git

ReBuy.lk is a client-based web application developed using the MERN stack that operates as a second-hand goods marketplace. The system allows suppliers to supply products to the platform, manages inventory through stock management, and supports customer orders and payments. Implemented CRUD operations, integrated RESTful APIs, and collaborated using GitHub.

### Online E-Shopping Store

Jan 2025 - Jun 2025

Role: Backend Developer (Team Project)

Technologies: Java, JVM, MySQL, MVC Architecture, Git

Developed an online e-shopping store using Java, featuring user authentication, product browsing, order management, and admin dashboard functionalities. Implemented CRUD operations and database integration while working in a team environment.

Role: Android Developer  
Technologies: Kotlin, Android Studio, Shared Preferences, Git

Developed a mobile application focused on promoting healthy lifestyle habits, allowing users to track wellness activities and access health-related features through a user-friendly interface. Contributed to UI design and application logic while working in a team environment, gaining experience in mobile app design and development workflows.

Financial Advisor Portfolio

Jan 2026

Role: Frontend Developer  
Technologies: React.js, TailwindCSS

A professional, responsive portfolio website developed for a real client, a Financial Advisor working with Sri Lanka Insurance Life. This website is designed using psychological marketing strategies to build trust, highlight achievements, and attract potential insurance clients. Focused on designing a responsive and user-friendly interface while implementing interactive data visualizations. Gained hands-on experience in frontend development.
